

WHICH INTERIOR DESIGN PROCESS

IS RIGHT FOR ME?

Are you a natural project manager who can save some money (and have fun) managing part of the design yourself?
Or are you overwhelmed with options and looking for the one experienced professional to guide you all the way?
Whatever you need, our Signature Process can be molded to you.

E-DESIGN

We have this consultation over a Zoom call—you can't get more convenient than that!

We provide you with a list of the measurements we need, and you take them to send to us.

We give you recommendations to best use the space, as well as recommended floorplans and installations.

You develop and finalize the details of your space, according to the suggestions you like best.

We provide you a list of suggestions of manufacturers, craftsmen and sellers you could buy your pieces from.

You purchase your products and install them on your own or with the professional you choose.

ROLL-OUT

FULL DESIGN

We come to your home to see the space you're designing, to review existing furniture, and to take measurements.

We already took measurements at your consultation!

We create floorplans, drawings, and 3D renderings for your project—whatever you need to "see" it!

You have another consultation (this time conveniently on Zoom) to talk about your design and discuss changes you want.

Once you approve design, we order all materials, furnishings and accessories, then store them in our warehouse until install.

We bring everything in to install at once. Then, you celebrate the big reveal!

You can mix and match your interior design time, too. If you want us to come out and measure, for example, but plan to install everything yourself, you can get custom design quotes by writing us at design@signaturehomeservices.com.
