# WHAT TO KNOW

## *Duct Cleaning*

### BREATHE CLEAN WITH OUR SIGNATURE AIR DUCT CLEANING

Some homeowners are more sensitive to contaminants from pets, smoke, dust from remodeling projects and allergens.

Even without added sensitivities, air inside the home is on average 10 times more polluted than outdoor air.

Your heating and cooling system is like the respiratory system of your home. It gets dirty and affects the health of other systems.

Our service experts examine and clean your ducts to maximize your HVAC performance. Breathe easy with the cleanest air your home can provide.

#### **How Your Ducts Are**

##### **Cleaned Makes a Difference**

The EPA recommends that the air ducts in your home be cleaned as needed, meaning inspections are essential to know when the time has come.

#### **With the RotoBrush cleaning process, we:**

1. Remove all register covers and clean through them to remove contaminants.
2. Then insert a hose and rotating brush head to clean the duct work.
3. Last, we fog cleaned ducts with an antimicrobial mist to keep your air safer longer.

**SIGNATURE**  
HOME SERVICES

#### **Energy Savings**

According to the U.S. Department of Energy, 25-40% of the energy used to heat or cool your home is wasted.

Contaminants in your air ducts cause your system to work harder and fail faster.

Trust in our Signature Service Experts to keep your system in shape. Save energy, save money, and breathe clean.

#### **What Sets Us Apart?**

Our team trains at Rotobrush International Headquarters to learn from the best.

When we come to your home for service, we start by sending a specialized camera into your ducts so you can see the condition before we get to work. We then use our equipment to get to work and give you the cleanest duct system since its installation.

#### **DID YOU KNOW?**

Children lose 14 million school days every year because of asthma and allergies, and clean ducts have a direct impact on that air quality at home.

#### **DID YOU KNOW?**

If you haven't had your ducts cleaned after moving into a new home, you're breathing in the old homeowners plus the contaminants that make inside air 10 times more polluted than outside air.

## SIGNATURE DESIGN-BUILD PROCESS

Clear and consistent communication is the key to a smooth home remodeling process. And our no-risk Signature Process has been designed over the course of many, many projects, and with decades of experience to streamline each project for the remodel experience you deserve.

### Signature Consultation

This stage speaks to the dedication we have to learning about you, your priorities, and your goals. You'll learn how the company works, and at the end of the consultation you'll decide along with us if we're a fit.

### Signature Design

During the Signature Design Phase, the team gathers information like measurements, space designs, fixture and material selections. You'll also see your 3D design and experience your renovation visually for the first time.

### Signature Remodel

Remodeling starts with detailed construction planning. Project expectations are set and all questions you have are answered. After all that planning, now you can sit back and let the Signature Remodel unfold. Our team will provide you with daily progress reports and the cleanest and safest job site possible.

And then...the moment that makes it all worth the effort: your project is finished, on time and as expected.
